

NJDEP Millstone Watershed Integrated Water Quality Assessment 2002-2008

Designated Use - Aquatic Life (General)

02	04	☐	MEETS STANDARD
08	06	■	SUBSTANDARD

Each block represents a reporting year

Aquatic Life Use is defined as the maintenance, migration, and propagation of the natural and established biota. In some limited cases, it also means a set aside for posterity to represent the natural aquatic environment and its associated biota.

Assessment based on biological monitoring or, if biological data is not available, on tests for pH, dissolved oxygen, temperature, total phosphorus, and total suspended solids.
