

## StreamWatch Monitoring Dates – 2012

### River Action Teams (RATs)

Month
February
May
July
October

**NOTE:** In addition to these dates, one high flow (the day after a storm event) and one low flow (after 10 days of no rain) must be documented each year. You can arrange it so that the seasonal survey and the flow survey are done at the same time (e.g., if you go out in May the day after a storm event, then you have fulfilled both your seasonal and high flow requirements).

**NOTE:** Reports should be received the 1<sup>st</sup> week of the following month.

Questions? Contact StreamWatch Coordinator Erin McCollum at (609) 737-3735 x.17 or [emccollum@thewatershed.org](mailto:emccollum@thewatershed.org).
